WEBSITE PROJECT PROPOSAL

Lumina Events

A professional event planning and decor website

Student Name	Faruque Valigy
Student Number	ST10520864
Module	WEDE5020
Date	30 July 2026

Lumina Events was selected.

1. Organisation Overview

Lumina Events is a fictional South African event planning and decor company serving private and corporate clients. The company specialises in birthdays, weddings, baby showers, bridal showers, graduations, anniversaries, corporate functions and other special occasions. Lumina Events creates memorable experiences through elegant decor, personalised planning and responsive customer service.

Mission: To provide creative, affordable and high-quality event planning and decor services while making the booking process simple, fast and stress-free for every customer.

Vision: To become one of Johannesburg's leading event planning companies, recognised for creativity, professionalism and unforgettable customer experiences.

Target audience:

Young adults that are planning birthdays, graduations and celebrations.

Couples planning engagements, weddings and anniversaries.

Families hosting baby showers, bridal showers and private events.

Businesses organising corporate events and product launches.

Schools, churches and community organisations.

2. Website Goals and Objectives

The proposed website will establish Lumina Events' online presence, showcase its services and make it easy for customers to request quotations and submit booking enquiries.

Objectives:

Increase online booking enquiries.

Provide a fast and seamless booking-enquiry process.

Showcase previous event setups through a professional gallery.

Build trust through testimonials, FAQs and clear service information.

Improve mobile usability, readability and accessibility.

Key performance indicators (KPIs):

Monthly website visitors.

Booking enquiry form submissions.

Confirmed bookings attributed to the website.

Average response time to customer enquiries.

Customer satisfaction and repeat bookings.

3. Current Website Analysis

Lumina Events is a new fictional business and does not currently have a website. The main opportunity is therefore to create a clear, credible and mobile-friendly online presence from the ground up. The proposed website will allow visitors to browse services, view event setups, request quotations and contact the company without relying only on social media or word-of-mouth referrals.

4. Proposed Website Features and Functionality

The initial website will contain the following pages:

Home (index.html): Hero image, introduction, call to action and navigation.

About Us (about.html): Company story, mission, vision and service values.

Services (services.html): Event categories, packages and inclusions.

Gallery (gallery.html): Event styling examples with descriptive alt text.

Book an Event (booking.html): Enquiry form for event type, date, venue and requirements.

Contact (contact.html): Contact information, locations, map placeholder and enquiry options.

Planned functionality includes responsive layout, a booking-enquiry form, a JavaScript image gallery, FAQ interaction, social-media links, a WhatsApp contact button and an embedded Google Map in a later phase.

5. Design and User Experience

The visual direction will be elegant, warm and celebratory. The proposed colour palette is white, champagne beige, muted gold and dark charcoal. Poppins will be used for headings and Aptos or Arial for body text. The interface will use consistent navigation, strong contrast, readable font sizes, descriptive link labels, visible call-to-action buttons and a mobile-first layout. Large event imagery will support the brand while being compressed and given meaningful alternative text for performance and accessibility.

A low-fidelity wireframe will be produced in Figma before detailed styling. It will show the hierarchy of the home page, service cards, gallery, enquiry form and contact section.

6. Technical Requirements

Domain: luminaevents.co.za is proposed for a professional South African online presence.

HTML5: semantic structure for all pages.

CSS3: layout, colour, typography and responsive design.

JavaScript: navigation behaviour, gallery interaction and client-side form validation.

Visual Studio Code: development and editing environment.

Git and GitHub: version control, backups and lecturer access.

7. Timeline and Milestones

Period	Phase	Deliverable
30 Jul - 8 Aug 2026	Planning	Finalize proposal and research sources.
9 - 16 Aug 2026	Structure	Create sitemap and low-fidelity wireframes.
17 - 23 Aug 2026	Content	Prepare copy, images and page content.
24 - 30 Aug 2026	Review	Proofread and submit Part 1.
2 - 13 Sep 2026	HTML	Build and link the initial HTML pages.
14 - 20 Sep 2026	CSS	Apply styling and responsive layout.
21 - 27 Sep 2026	JavaScript	Add interaction and form validation.
28 Sep - 2 Oct 2026	Testing	Test links, spelling, layout and responsiveness.
3 - 4 Oct 2026	Finalize	Review, commit and upload the project.
5 Oct 2026	Submission	Submit Part 2 before 23:59.

8. Budget

Item	Estimated cost
Website design	R6 000 once-off
Website development	R10 000 once-off
Domain (.co.za)	R105 per year
Web hosting	R99 per month
Maintenance	R500 per month

These figures are planning estimates and should be confirmed with a hosting provider and developer before any commercial launch.
